New Gasoline Injector Multi-Packs

GB Reman is pleased to announce the release of 24 gasoline fuel injector multi-packs.

Covering 5,500 vehicle applications and over 43 million vehicles in operation, these domestic and import MPFI and GDI injector multi-packs have been carefully designed to provide comprehensive coverage while maximizing value to ensure that the job is done right the first time, every time.

GB Reman has the most complete fuel injection program available in the automotive aftermarket. GB Reman's complete line of fuel injectors are remanufactured in the USA, 100% tested to meet or exceed OEM specifications and backed by GB Reman's industry-leading 24-month unlimited mileage warranty.

GBTK-001
Premium GDI Seal Tool Kit

NEW PRODUCT

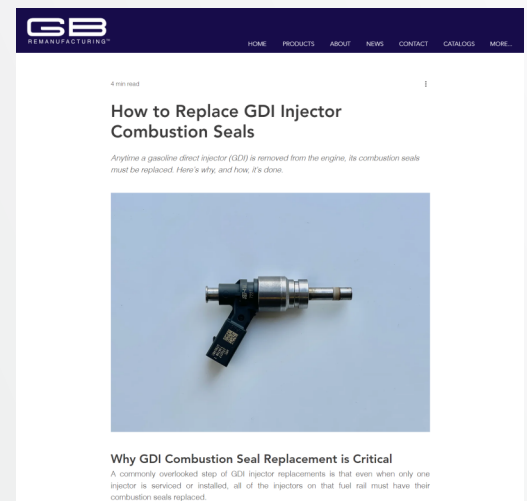

PREMIUM GDI SEAL TOOL KIT

GB Reman is pleased to release its new premium GDI seal tool kit. GB Reman's premium GDI seal tool kit can be utilized to reseal over 100 unique GDI injectors, covering over 70 million vehicles in operation.

TECH TIP

GDI SEAL REPLACEMENT PROCEDURE

As part of any GDI injector replacement procedure, all injectors on the fuel rail must have their injector seals replaced. While replacing GDI combustion seals is not technically challenging, proper tools and procedures are necessary to ensure that the seals function properly. Use GB Reman's premium GDI seal tool kit (P/N GBTK-001) to ensure the job is done right the first time, every time. For step-by-step procedural instructions, we encourage you to visit the GB Reman Knowledge Center at www.gbreman.com/knowledgecenter.

New Gasoline Fuel Injectors

GB Reman is pleased to announce its latest release of remanufactured Gasoline Direct Injectors (GDI), Multi-Port Fuel Injectors (MPFI), and one GDI seal kit. These 16 part numbers cover over 9 million vehicles in operation and over 800 unique vehicle applications.

GB Reman's line of remanufactured fuel injectors are remanufactured using a proven 15 step process at our state of the art facilities in Long Beach, California. GB Reman has the technical expertise and equipment to replace internal injector coils, injection mold new fuel injector bobbins, and wind them to OEM specifications. When necessary, new connectors are molded on the injector which are color matched to their OEM specifications. All injectors include new external seals and o-rings. In addition, all GDI injectors include pre-installed combustion fuel inlet seals and necessary hardware to ensure a complete and trouble-free installation.

Once remanufactured, each injector is 100% tested under multiple operating conditions to ensure it meets or exceeds OEM specifications for flow rate, spray pattern, coil resistance, form, fit and function.
