

GB Remanufacturing, Inc. is pleased to announce the release of its Premium Diesel Gasket program. This new engineered solution is a complete line of high quality valve cover gaskets for light and medium duty diesel applications including the Ford 6.0L and 7.3L Power Stroke, the Dodge Cummins 5.9L and 6.7L, and the GM Duramax 6.6L.

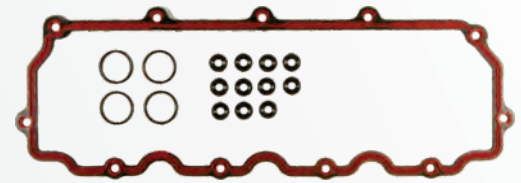

GB Remanufacturing's valve cover gaskets are constructed of premium synthetic rubber compounds such as high temperature silicone and hi-tech Fluoroelastomer (FKM) materials. The vast majority of the gaskets and component parts are manufactured in the USA. Comparing our product with the many off-shore offerings, it becomes clear that their product is made using inferior rubber compounds consisting of low-cost fillers which result in inconsistent sealing and poor high temperature resistance.

During injector replacement, the valve cover must be removed on most applications. This is a perfect time to replace the valve cover gasket to ensure a professional, leak-free repair. Our gaskets are packaged per side (bank) for all V8 applications, unlike most competitive offerings. Gaskets packaged per bank allow for a more cost effective repair when servicing the injectors.

The GB gasket kits include necessary additional items to ensure the job can be completed right the first time. This includes bolt isolators, ancillary o-rings, other seals and silicone where required.

**Ford 6.0L Power Stroke (2003-2010) & Navistar/International 6.0L VT365 (2002-2007)**

| Year    | Application/Product Note   | Premium Gasket Kit |
|---------|--|--------------------|
| 2003-10 | Ford 6.0L Power Stroke. Includes bolt isolators and crankcase breather seals. Services 1 bank.       | 522-031            |
| 2002-07 | Navistar/International VT365. Includes bolt isolators and crankcase breather seals. Services 1 bank. |                    |

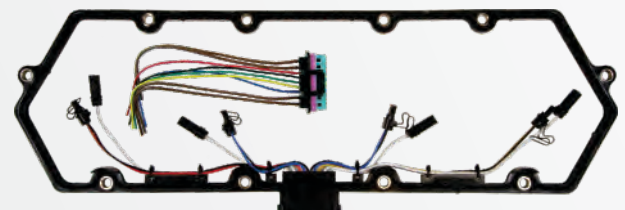

522-031

**Ford 7.3L Power Stroke (1994-2003) & Navistar/International 7.3L T444E (1994-2003)**

| Year    | Application/Product Note | Value Gasket Kit | Premium Gasket |
|---------|--------------------------|------------------|----------------|
| 1998-03 | Services 1 bank.         | 522-023          | 522-003        |
| 1994-97 | Services 1 bank          | 522-024          | 522-002        |

522-003  
Premium Gasket

522-023  
Value Gasket Kit

GB offers a total of four part numbers for the popular 7.3L covering all applications. Our premium gasket-only option (522-003 Shown) is constructed of premium materials and offers the best compression set ratio in the industry (US Made).

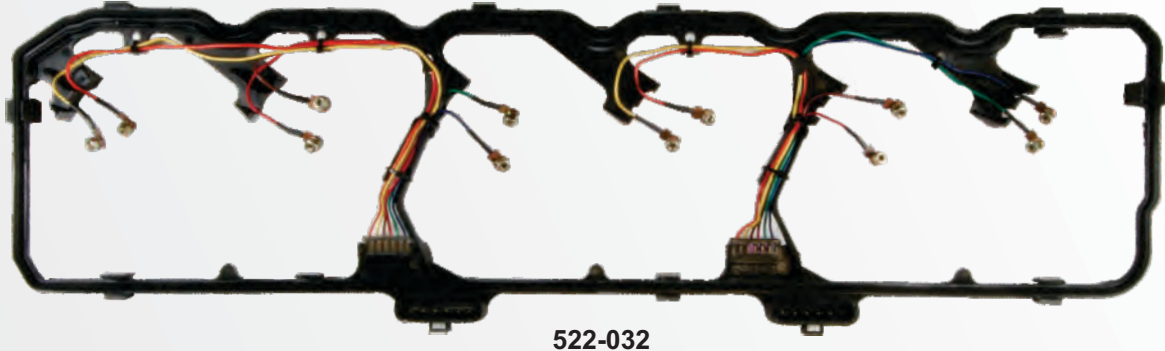

GB also offers a value gasket kit (522-023 Shown) for cost conscience consumers. This gasket includes molded-in internal wiring harness for the injectors and glow plugs, as well as an external connector pigtail.

Also available are harness repair pigtails for the 7.3L, Part numbers; 522-004, 522-005, 522-010 & 522-011. See GB's complete diesel catalog for details.
