

Remanufactured Ford 7.3L Power Stroke Injector Driver Modules (IDM)

GB Remanufacturing, Inc. is pleased to announce the release of remanufactured Injector Driver Modules for the Ford 7.3L Power Stroke diesel. These modules fit 1994 ½ through 2003 model years and is covered by two part numbers. Over 2 million 7.3L Power Stroke engines were produced which utilize the IDM module.

The IDM works in conjunction with the vehicle's on-board computer. It is responsible for developing the high-voltage signals necessary to actuate the Hydraulic Electronic Unit Injectors (HEUI) utilized by the Power Stroke engine. The module is susceptible to failure due to water intrusion and internal component failure.

Each module is completely disassembled and all electronic components are tested. Faulty components are replaced, the case cover is replaced and the enclosure is modified and updated to prevent water intrusion, a common failure mode. All units are 100% tested prior to shipment.

GB also offers a complete line of gasoline and diesel fuel injectors, including injectors for the Ford 7.3L Power Stroke.

For more information regarding GB's extensive product line contact GB or visit GB's website at www.gbreman.com.

GB Part #: 921-120
1999-2003 Ford Power Stroke
Fits OEM Numbers:

2C24-12B599-AA
2C24-12B599-AB
XC3F-12B599-AA
XC3Z-12B599-AA
